# Knockout Course Modules

**Introduction**

**Observables**

**Bindings**

**Data Features**

# What is Knockout?

- **JavaScript MVVM Framework**
- **MVVM – Model-View-View Model**
  - Model – objects in your business domain
  - View – user interface that is visible to user
  - View Model – code representing data/operations on a UI
- **Complementary to other JavaScript frameworks**
  - e.g., jQuery, CoffeeScript, Prototype, etc.

# Knockout Elevator Pitch

Declarative Bindings

Automatic UI Refresh

Dependency Tracking

Templating
